

Onyx Commodities Limited - IFPR Disclosure 2025

Introduction

In accordance with the Financial Conduct Authority's ("FCA") UK Investment Firms Prudential Regime, ("IFPR")¹ Onyx Commodities Limited ("Onyx" or "the firm") is required to disclose the following:

- 1) Governance arrangements.
- 2) Own Funds requirements.
- 3) Own Funds.
- 4) Risk management policies.
- 5) Remuneration policy and practices.

As of 2025, Onyx's financial year runs from January to December. The 2025 financial year is therefore a 12-month period from January 2025 to December 2025. This next update of this disclosure will be shortly after the publication of Onyx's audited accounts for FY26, in line with MiFIDPRU 8.1.10R.

1) Governance arrangements

In accordance with MIFIDPRU 8.3, Onyx is required to disclose certain internal governance arrangements. Effective governance arrangements help a firm achieve its strategic objectives while also ensuring that risks to the firm, its stakeholders and the wider market are identified, managed and mitigated.

Onyx's governance framework:

- Safeguards overall responsibility for the firm;
- Approves and oversees the implementation of strategy objectives and risk strategy;
- Ensures the integrity and accuracy of the firm's operations including but not limited to accounting, financial reporting, legal and compliance, monitoring; and
- Provides responsibility for delegation and effective oversight of senior management and all other staff.

Overview

Board of Directors

The Board is collectively responsible for:

- setting an appropriate risk strategy and appetite;
- promoting a comprehensive risk culture and awareness;
- monitoring the implementation of the firm's risk strategy;
- ensuring the independence of the control functions such as Compliance and Risk; and
- verifying that independent control functions operate correctly and effectively.

	External Executive Directorships Held	External Non-Executive Directorships Held
Chief Executive Officer	1	0
Chief Investment Officer	1	0

Diversity

Onyx strives for diversity and inclusion on its management body, and does not discriminate on the basis of gender, ethnicity or any other protected characteristics in accordance with the Equality Act 2010.

2) Own Funds requirements

In accordance with MIFIDPRU 8.5, Onyx is required to disclose the following:

Figures as of December 31st, 2025.

K-DTF (Daily Trading Flow)	£613,445
K-NPR (Net Position Risk)	£11,351,084
KFR Total (K-Factor Requirement / Own Funds Requirement)	£11,964,529
FOR (Fixed Overhead Requirement)	£7,505,000

Firms must assess to what extent the Own Funds Requirement accounts for all the risks identified as part of the ICARA process. Where risks are not covered, the firm must assign additional regulatory capital. The result of this assessment is the Overall Financial Adequacy Rule ("OFAR"). In accordance with the OFAR, Onyx assesses the risks associated with the business model and consider whether any additional capital is required to mitigate them should they materialise. This includes considerations of wind-down costs and whether the requirements under the IFPR cover the risks to market, firm and clients.

Onyx concluded that from an Own Funds perspective, the K-Factor requirement represents a suitable level of capital for the firm to remain viable throughout the economic cycle. Therefore, Onyx has not set a separate fixed OFAR figure, but will monitor and maintain sufficient Own Funds in line with the K-Factor Requirement.

3) Own Funds

In accordance with MIFIDPRU 8.4, Onyx is required to disclose the following:

Figures as of December 31st, 2025.

	Item	Amount (GBP thousands)
1	OWN FUNDS	57,144
2	TIER 1 CAPITAL	57,144
3	COMMON EQUITY TIER 1 CAPITAL	57,144

3	Total Liabilities	34,095
Shareholder's Equity		
1	Called up share capital	2
2	Capital contribution reserve	2,581
3	Profit and loss account	55,389
4	Total Shareholders' equity	57,972

4) Risk management policies

Own Funds

The Own Funds Requirement under the Investment Firms Prudential Regime is a reflection of the risk that a firm poses to clients, itself and the wider market. The figure reflects the level of capital that is required to cover the risks that the firm poses. Onyx ensures that at all times, the Own Funds held are higher than the Own Funds Requirement. Maintaining compliance with the capital requirements set by the FCA is one of the firm's highest priorities.

Onyx's Own Funds Requirement is dominated by its Net Position Risk due to the fact that the firm is a liquidity provider in commodity derivatives. The only two K-Factors applicable to Onyx are Net Position Risk (K-NPR) and Daily Trading Flow (K-DTF). As per the Own Funds figures above, Onyx's Own Funds Requirements are driven by the NPR figure, comprising around 98% of the overall requirement at 31st December 2025.

The dominant K-Factor, K-NPR, is classified as a "Risk-to-Market" measurement by the FCA, which is in line with Onyx's assessment of potential harm associated with its business model. Failure of the firm would have an impact on wider energy derivative markets due to the significant liquidity that Onyx provides. Loss of such liquidity would likely create more volatile market conditions. Managing and mitigating Onyx's risk to market is described in detail in the firm's ICARA and Risk Framework documents.

Onyx treats the Own Funds Requirement with the highest priority and is therefore proactive in the monitoring and management of the capital position.

The NPR calculation is an assessment of all Onyx's positions and their notional value; it therefore changes every business day. In light of this, Onyx generates the NPR figure daily to calculate the Own Funds Requirement to which Onyx is subject. Onyx is conscious that times of volatility and increased market prices can push up the NPR figure, so the calculation is closely monitored, and a capital buffer is maintained to avoid close calls or breaches.

Onyx operates with an additional, more conservative threshold limit in place, which triggers internal actions when surpassed. These actions can include reducing positions to reduce the NPR figure. Onyx's Risk Team also monitors live and intraday risk.

Daily Trading Flow is more stable, although it is also calculated daily. It is nonetheless taken into account as part of the daily assessment of Onyx's Own Funds Requirement.

Liquidity

Liquidity Risk arises when a firm is unable to meet its short-term financial obligations as they fall due.

The potential harm of liquidity risk associated with Onyx's business strategy is limited because all transactions on-exchange are cleared by ABN Amro, and Onyx has no clients. As such, outgoing payments are limited in size and number, for example, to third party service providers or routine business costs. These costs are not significant and do not put pressure on the liquidity position of the firm.

Onyx also has a strong liquidity position consisting of CET1 capital as a result of its consistent trading profits. Regardless, Onyx monitors its liquidity position against its requirement daily.

Concentration

Onyx has no clients and all trades are cleared, therefore Onyx does not have any counterparty exposure in its trading book. The concentration risk to firm and the wider market is considered minimal as a result of this.

Concentration risk in exchange traded products and contracts is managed by the Onyx Risk Team to prevent significant exposure to specific contracts or refined products/product groups. Concentration risk is monitored inter- and intra-day by the Risk Team.

5) Remuneration policy and practices

Qualitative disclosures

Onyx's business strategy is to develop and expand its liquidity provision. Onyx's remuneration policy encourages staff to responsibly promote the success of the business through their role.

The Remuneration Committee aims to incentivise and reward staff. Onyx's policy has been written in line with the firm's cultures and values. Performance criteria includes both financial and non-financial indicators, but will differ depending on an individual's role within the firm. Onyx encourages responsible business conduct and fair treatment of any other market participants. Performance assessments include considerations of business strategy and objectives, compliance with regulatory obligations, culture and conduct, and adherence to effective risk management. These assessment considerations, derived from the firm's risk profile, discourage any behaviour or action which could cause detriment to the business or wider market.

All remuneration paid to staff is clearly categorised as either fixed or variable. Such fixed remuneration must be and is recognised as adequate compensation to an individual for the provision of their services in accordance with a contract.

All employees receive a salary as agreed in their contract, which comprises the fixed part of their remuneration.

The main form of variable remuneration available to Onyx's Code Staff, is an annual, discretionary cash bonus dependent both on their own individual performance and that of Onyx's. All employees are eligible.

Financial performance is an important factor in the calculation of any variable remuneration. Onyx's measurement of financial performance is assessed based on profit (not revenue or turnover). Awards will reflect Onyx's financial performance and as such, variable remuneration will be contracted where subdued or negative financial performance occurs.

All end-of-year discretionary bonuses can be considered ex-post adjusted as they are a reflection of both the firm and individual's performance, so are adjusted accordingly. In light of this, there is by default, no ex-ante adjustment made to the variable remuneration amounts because they are based on historical data.

Onyx does not reward failure and maintains controls around malus and clawback. Examples of where malus may be applied, include (but are not limited to):

- cases of fraud or other conduct with intent or severe negligence which led to significant losses;
- where the Material Risk Taker ("MRT") in question participated in or was responsible for conduct which resulted in significant losses to firm, or
- where the MRT in question failed to meet appropriate standards of behaviour and/or fitness and propriety.

In the case of early termination of a contract, any payments will reflect performance achieved over time.

In both measuring and allocating variable remuneration, Onyx's Board will make qualitative judgements, considering the firm's Internal Capital Adequacy and Risk Assessment ("ICARA"), and will consider the current and future risks faced by the firm. Considerations include capital, liquidity and Own Funds planning in line with the ICARA, in addition to the assessment of risk. Onyx only awards guaranteed variable remuneration in rare scenarios and in line with SYSC 19G.6

Onyx identifies Material Risk Takers as any members of the firm's management body, senior management or any individual with managerial responsibility for certain areas of the business. All Proprietary Traders and Direct Traders are also included.

Quantitative disclosures

	Senior Management	Other MRTs	All Other Staff
Number of Staff	9	57	53
(GBP thousands)			
Total Fixed Remuneration	1,955	5,869	3,162
Total Variable Remuneration	313	7,279	119
Total Awarded Remuneration	2,268	13,148	3,280

Serverance payment information has been redacted in accordance with MIFIDPRU 8.6.8 R(7) to prevent identification of an MRT

Onyx Commodities Limited and Onyx Capital Advisory Limited share multiple Senior Managers who provide services to both firms. Where a Senior Manager provides services to both firms, they have been included in the Senior Manager head count for both firms, however their remuneration has not been double-counted and has been included solely in the disclosure of their employer.
